about me

Going to the burn since 2007

11 big burns

Ran The Forgotten City 2011-2015 (Vegas)

Built dust in 2023

Build GoMobile Events in 2011 (Tickets)

Solution Architect for Ionic (Mobile Apps)

dust

dust is a guide for burners to find events, camps and art.

dust

dust is a platform to manage a regional burn.

the dust app

why dust?

- Chaotic grind to validate event / camp / art information
- Camps register and bail late
- Events change due to weather, cancellations, mood
- Not all camps require placement
- Event guides take time to curate but change after printing
- No cell service (website / map)
- Google maps is static

what does dust do?

dust: register stuff

theme camp registration

event registration for open camping

art car registration

art registration

event registration for camps

event registration for art

music registration

registration choices

Google Forms / Airtable

↓

Changes?

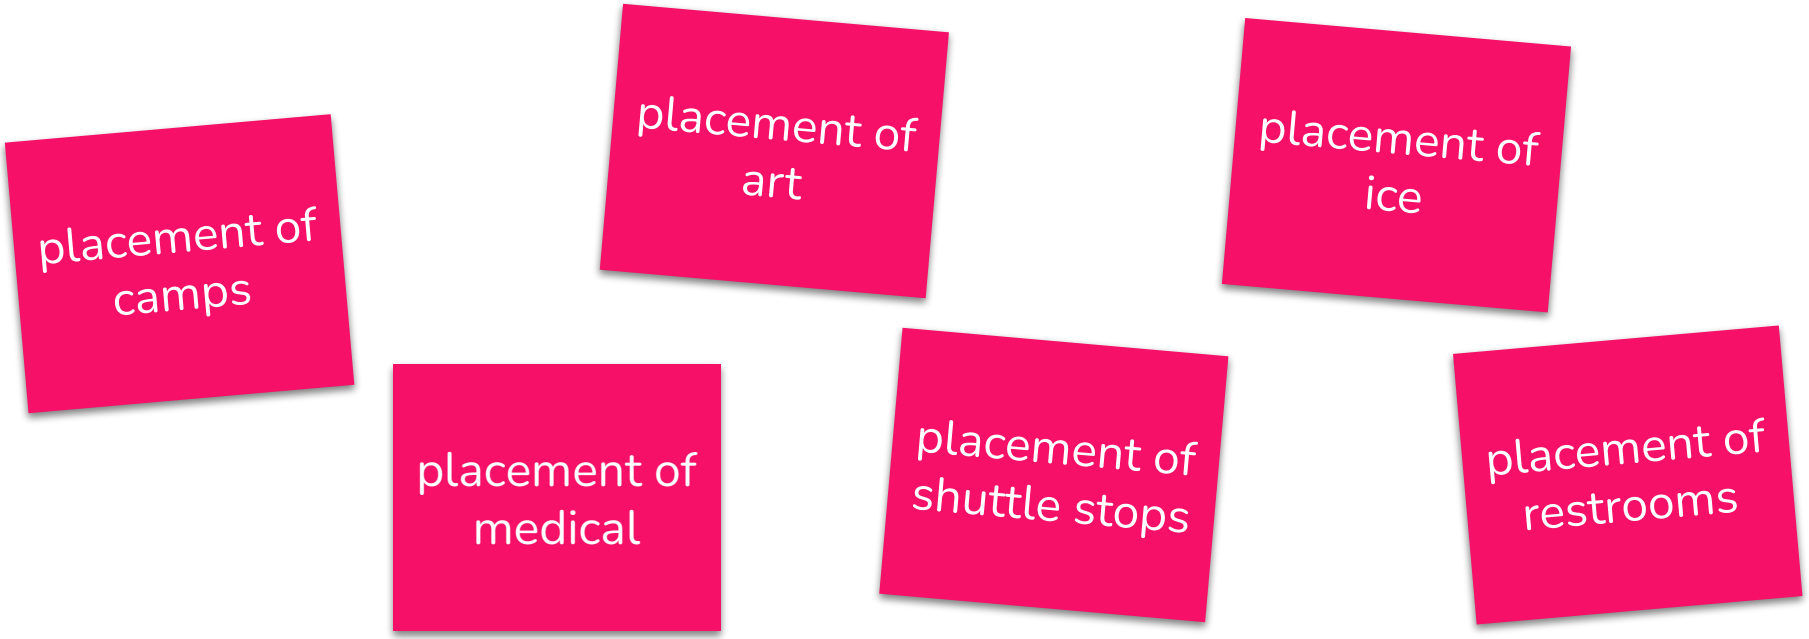
↓

Export CSV and Import into dust (crunch time)

Website link to registration for camps/events in dust

↓

Participants can manage their camp/art/events



dust: map stuff

placement choices

Google Maps

Export KML and import into dust*

*names must match

Place camps, art and points in dust

*need a good map image

dust: import stuff

import art CSV

import from Google Maps KML

import camps CSV

import events CSV

dust: web stuff

dust: export stuff

art
